DETAILED ACTION

Claim Objections

1. Claims 3-18 are objected to under 37 CFR 1.75(c) as being in improper form because multiple dependent claims 3, 9, 11, 12, 14, 17, 18. See MPEP § 608.01(n). Accordingly, the claims 9-18 have not been further treated on the merits.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 20 recites the limitation "the front end" in line 2. There is insufficient antecedent basis for this limitation in the claim.
5. For the purpose of this Office action, the claims will be examined as best understood by the examiner.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1, 2, 6-8, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by McRitchie.

McRitchie discloses a liquid spraying apparatus comprising: a spray gun body 10, a spray head body 210 that is releasably connected at a rear end to the spray gun body 10, wherein the spray head body 210 and a front end of the spray gun body 10 are provided with a bayonet mateable formation 106/214/216, a needle 228 connected to a trigger mechanism 62/78, air outlets 326 provided at the front end of the spray head body 210, a reservoir 18 mounted on the spray head 12 with a bayonet type connection 154/158 (see figure 5), a remote reservoir could be attached to the nipple 210 by a flexible hose, and a means 308 to adjust spraying characteristics.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over McRitchie in view of Holt.

McRitchie teaches all the limitations of the claims except for a remote reservoir that is connected by a flexible hose and a manual shut off valve. However, Holt discloses a spray gun 88 connected to a remote reservoir by a flexible hose 86 that has a manually operated valve 32. Therefore, it would have been obvious to one having ordinary skill in the art to have provided the device of McRitchie with a remote reservoir that is connected by a flexible hose and a manual shut off valve as suggested by Holt. Doing so would provide an effective spraying system (see column 3, lines 15+).

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The following patents are cited to show the art with respect to liquid spraying apparatus: Grime, Mattson, Robisch et al., and Turnbull.
